

International Research Careers

Postdoc Mobility, Global Exchange & Strategic Internationalisation in Challenging Times

Programme & Exhibitor Guide

Is it still advisable to plan a postdoc abroad?

How is geopolitics changing collaboration?

How to fund a postdocs outside Germany?

What are options for international postdocs?

How do universities adapt their internationalization strategy?

For many researchers, international experience remains one of the most valuable opportunities for personal growth, scientific development, and building lasting professional networks. Even in challenging times, I would strongly encourage postdocs to stay curious, internationally connected, and open to research experiences abroad. Scientific progress depends on global exchange – and early-career researchers are an essential part of shaping this international scientific community. Events like this aim to provide orientation, honest discussion, and practical perspectives for researchers navigating these important career decisions.

— Prof. Dr. Markus Schwaiger,
President of the Bavarian Academy
of Sciences and Humanities

— Dr. Anne Schreiter,
Executive Director of GSO – Guidance,
Skills & Opportunities for Researchers

International mobility is an essential part of excellent research. Germany already attracts many outstanding international PhD candidates and postdocs. At GSO, we see great potential in creating long-term career perspectives that allow more of them to take the next steps as group leaders and professors here. By creating the conditions for the next generation of researchers to build their careers in Germany, we can help scientific excellence grow, thrive, and remain here in diverse research environments.

— Dr. Melanie Schippling,
GPN Coordinator

Some of the most meaningful moments in a research career begin with the decision to step beyond familiar borders.

Indeed, our work at the German Postdoc Network constantly reminds us that international mobility is more than moving between countries: it is about fresh perspectives, exchanging ideas, and building trust for a stronger global research community, as it connects people and opportunities in ways that shape both science and ourselves.

International research thrives on personal connections, trust, and long-term collaboration across borders. At the Alexander von Humboldt Foundation, we see every research stay abroad not only as an individual career step, but also as the beginning of lasting international networks that connect researchers, institutions, and societies worldwide. Especially for postdocs, international mobility can open doors to new scientific perspectives, collaborations, and opportunities that shape careers far beyond a single project or fellowship.

— Markus Zanner,
Secretary General of the
Alexander von Humboldt
Foundation

Welcome!

Welcome to this event on postdoctoral mobility, global exchange, and strategic internationalisation in challenging times, organised here in Munich by the Bavarian Academy of Sciences and Humanities (BAdW), the Alexander von Humboldt Foundation (AvH), and the German Postdoc Network (GPN).

International experience can open up new perspectives, strengthen research collaborations, and create valuable opportunities for your academic career. But how can you plan an international research stay, find suitable funding, and build lasting connections across borders in a rapidly changing geopolitical landscape?

This event offers early-career researchers, research institutions, and experts a space to explore these questions. Through keynote presentations, panel discussions, and the Opportunities Fair, you will have the chance to discover funding schemes and support services, exchange experiences, and connect with points of contact that can help you take the next steps in your international research career.

It is a pleasure to welcome Humboldtians, members of the Bavarian Academy of Sciences and Humanities, and leaders from Munich's research community, who will share their personal insights and perspectives on international research careers and the broader strategic context of internationalisation. The discussions will also explore how universities and research organisations can shape their internationalisation strategies in response to current geopolitical developments and what this means for global research collaboration.

May this evening inspire you to explore new opportunities, expand your international networks, and reflect on the role of global collaboration in your own research career.

Wishing you an engaging and inspiring evening filled with stimulating discussions and valuable connections!

Directions

Bavarian Academy of Sciences and Humanities

Alfons-Goppel-Str. 11 (Residenz)

80539 München

[+49 89 23031-0](tel:+4989230310)

Open address in [Google Maps](#).

Open address in [OpenStreetMap](#).

Getting here by public transport

S-Bahn: 'Marienplatz' station (all S-Bahn lines)

U-Bahn: 'Odeonsplatz' station (U3, U4, U5, U6)

Tram: 'Nationaltheater' stop (Tram 19, 21)

Please note: As there are no parking spaces available at the Academy, we do not recommend travelling by car.

Agenda

4.30 PM **Registration**

5:00 PM **Welcome and Opening Remarks**

Prof. Dr. Markus Schwaiger
President, Bavarian Academy of Sciences and Humanities

Dr. Markus Zanner
Secretary General, Alexander von Humboldt Foundation

Dr. Melanie Schippling
Coordinator, German Postdoc Network

5:20 PM **Keynote**
The Double Helix of Innovation: Global Exchange and the Future of Science

Prof. Dr. Daniel Rückert
Alexander von Humboldt Professor of AI in Medicine and Healthcare,
Technical University of Munich

Prof. Dr. Andrea Bréard
Vice President for Education and Alexander von Humboldt Professor,
Chair of Sinology with a Focus on the Intellectual and Cultural History
of China, Friedrich-Alexander-Universität Erlangen-Nürnberg

5:45 PM **Panel Discussion**
**International Research Careers – Challenges and Opportunities for
Postdoctoral Researchers**

Dr. Alexander Rudolph
Postdoctoral Researcher, Institute for German Philology, LMU
Munich; Member, Young Academy of the BAdW

Ilka Schießler-Gäbler
Head of Unit Programs and Networks, Max Planck Society

International Research Careers
Postdoc Mobility, Global Exchange & Strategic Internationalisation in Challenging Times
Programme & Exhibitor Guide

Prof. Dr. Philipp Baumert

Assistant Professor and Scientific Director, Research Unit for Orthopaedic Sports Medicine and Injury Prevention, Institute for Sports Medicine, Alpine Medicine and Health Tourism, UNIT TIROL

Dr. Patricia Ogger

Project Leader, Max Planck Institute of Biochemistry

Dr. Anne Schreiter

Executive Director, GSO – Guidance, Skills & Opportunities for Researchers

6:45 PM **Opportunities Fair and Networking**
with Beverages and Fingerfood

7:30 PM **Panel Discussion**
Postdoctoral Mobility, Global Exchange and Strategic Internationalisation in Challenging Times

Dr. Markus Zanner

Secretary General, Alexander von Humboldt Foundation

Prof. Dr. Francesca Biagini

Vice President for Mathematics, Computer Science, Statistics and International Affairs, Ludwig-Maximilians-Universität München

Prof. Dr. Gerhard Kramer

Senior Vice President for Research and Innovation, Technical University of Munich

Prof. Dr. Petra Schülle

Director, Max Planck Institute of Biochemistry

Dr. Mostafa Moonir Shawrav

Executive Director, Marie Curie Alumni Association

8:30 PM **Closing Remarks & Networking**

Meet the Exhibitors of the Opportunities Fair

German Postdoc Network

The German Postdoc Network's mission is to improve the postdoctoral experience by creating opportunities for connection, collaboration, and identity-building. We aim to gather and disseminate crucial information ensuring postdocs are well-informed and supported. We give a voice to postdocs to represent their interests and influence policies that impact their professional and personal development.

If you're looking for support as a postdoc in Germany, the GPN is here to help. Next to information hub we also offer lunch talks on key topics like "Understanding the System", and our Annual Conference on Diversity, Wellbeing, and Career Development. But beyond events, we advocate for the postdoc voice - working on a unified definition and joint statements on the WissZeitVG. Come visit our booth to learn more and find out how you can get involved!

Our network is open to all Postdocs from all disciplines in Germany.

Meet us at the Opportunities Fair:

Alexandra McCormack, GPN Coordinator
Dr. Melanie Schippling, GPN Coordinator

GSO*

Guidance, Skills & Opportunities
for Researchers

Guidance, Skills & Opportunities for Researchers e.V. (GSO)

Guidance, Skills & Opportunities for Researchers e. V. (GSO) is an independent, non-profit organization based in Berlin that supports researchers in this “bottleneck” phase – the years after the PhD, when many key career decisions take shape.

What GSO offers

GSO’s work is structured around three closely connected areas:

- Guidance: Independent, individualized career advice, including coaching and CV checks – for careers in academia and beyond
- Skills: Workshops, webinars, and articles that focus on career development as a skill, from positioning to decision-making
- Opportunities: Funding programs and networks that provide flexible support and open up new perspectives

One example is the annual and free virtual conference “To be honest - Career Real Talk for Researchers”, which creates space for honest conversations about topics that are often left implicit – from uncertainty to inconvenient truths in academia.

Why this matters for postdocs

The postdoc phase can feel uncertain and demanding, while at the same time offering a wide range of possible directions. What is often missing is independent orientation and realistic insight into how careers actually unfold. GSO aims to fill this gap by providing practical support, honest perspectives, and space to reflect on your options. Some of GSO’s programs also offer leadership development or flexible funding opportunities that may be relevant at this stage.

The services and offers are open to researchers from all institutions.

Meet me at the Opportunities Fair:

Dr. Anne Schreiter, Executive Director

BAYERISCHE
AKADEMIE
DER
WISSENSCHAFTEN

Young Academy (Junges Kolleg) of the Bayerische Akademie der Wissenschaften

The Bavarian Academy of Sciences and Humanities brings together the best researchers in Bavaria and, as a platform for all academic disciplines, promotes collaboration between non-university research institutions and Bavarian universities. In doing so, it actively contributes to strengthening Bavaria's position as a center of excellence in science and research.

Its key areas of focus include forward-looking research in computer science, the social sciences, and the natural sciences, as well as fundamental research in the humanities and cultural studies. An important part of its mission is the sustainable advancement of the academic careers of outstanding postdoctoral researchers through the Young Academy.

For the duration of their fellowship, the fellows are associate members of the Academy and enrich academic life through their activities. They contribute to committees and working groups and develop interdisciplinary events as well as new research initiatives, both among themselves and together with the Academy's full members. The Young Academy enables its members to formulate their own research questions and to pursue independent academic work in collaboration with other outstanding scholars. It provides postdoctoral researchers in Bavaria with a forum for reflecting on innovative research approaches and methodologies. In this way, the Young Academy offers ideal conditions for dialogue across generations and disciplines, with the aim of bringing together the best researchers from all fields.

Members of the Young Academy receive annual funding of €12,000, which they are free to use at their discretion. The funding period is initially set at three years. Following a successful evaluation, membership may be extended for up to an additional three years.

You are eligible to apply to the Young Academy if you meet the following criteria: You have completed an outstanding doctoral degree and can provide evidence of independent academic research during the postdoctoral phase (e.g. publications, the amount of third-party funding secured, awards, etc.). You propose a forward-looking project that is suitable for interdisciplinary exchange and clearly distinct from your doctoral research. You have not yet reached the age of 35 at the time of application (periods spent on parental leave or caring for relatives may be taken into account). You hold a fixed-term position at a university or research institution in Bavaria.

Meet us at the Opportunities Fair:

Dr. Benjamin Schönfeld, Coordinator / Young Academy, BAdW

Felicitas Schmidinger, Coordinator / Young Academy, BAdW

Laura Bruckmeier, Trainee / Young Academy, BAdW

Sociedad de Científicos
Españoles en la República
Federal de Alemania

CERFA – The Society of Spanish Scientists in the Federal Republic of Germany Sociedad

The Society of Spanish Scientists in the Federal Republic of Germany (CERFA) was founded in 2013 with the aim of bringing together and connecting Spanish researchers pursuing their careers in Germany. We are an independent, non-profit scientific association that currently has more than 600 members and subscribers. Our work focuses on building a community, fostering collaboration, and supporting our members' scientific careers at every stage. If you're a researcher and have chosen Germany to advance your career, CERFA is the place for you, we also organize activities for non-Spanish researchers. We're supported by institutions and organizations that share our vision, such as the Ramón Areces Foundation, FECYT, the DAAD, and the Spanish Embassy in Germany, which provide us with resources, visibility, and collaboration.

Connect with the Spanish research community in Germany and beyond! CERFA offers career development and transferable-skills workshops, networking events, cultural activities, and a biennial scientific symposium with opportunities to present your thesis and win a prize. Our Traineeship Programme also helps you develop your teaching and mentoring skills by hosting a Spanish student.

CERFA is open to researchers at both academic and non-academic sectors working in Germany. For some activities, only Spanish researchers can participate, depending on the founding source of the activity.

Meet me at the Opportunities Fair:

Dr.rer.nat Sara Egea Rodríguez, Coordinator of the CERFA Cancer Group, Postdoctoral researcher at LMU Klinikum

TUM Talent Factory for Postdocs

The TUM Talent Factory for Postdocs provides support and trainings for all early-career researchers at TUM and to international postdocs who want to conduct a research project at TUM.

We offer career guidance, networking opportunities and workshops.

Our program is primarily aimed at TUM postdocs.

[Website](#) | Email: postdoc-application@tum.de

Meet me at the Opportunities Fair:

Dr. des. Miriam Schwägerl, Scientific Officer

TUM Global & Alumni Office / TUM Welcome Services

TUM Welcome Services support international researchers before and during their stay at TUM by providing guidance on administrative procedures and integration into Germany and university life.

We offer personalized support and guidance on relocation-related matters, including visas, residence permits, health insurance, housing, and everyday life in Munich and Germany.

Our services are primarily aimed at TUM postdocs and visiting professors.

[TUM Global & Alumni Office](#) | [TUM Welcome Services](#)

Meet me at the Opportunities Fair:

Carina Kanischew, Advisor for International Researchers

LMU Research Funding Unit

LMU Research Services supports researchers at LMU in developing their research careers and turning innovative ideas into successful projects. We provide comprehensive advice on research funding, proposal development and career opportunities, with tailored services for researchers at different career stages. For postdocs, our support includes individual funding and career consulting as well as the LMU #EXCELLerate Postdoc Career Program.

The LMU Research Funding Office supports postdocs with individual advice on funding opportunities, research proposals and career development. Our Career Consulting and the LMU #EXCELLerate Postdoc Career Program offer tailored guidance, workshops and networking opportunities to help you shape your career — in academia or beyond.

Our services are open to all researchers working at LMU

[Website](#) | [LinkedIn](#) | Email: forschungsfoerderung@lmu.de

Meet us at the Opportunities Fair:

Dr. Anna-Katharina Krüger, Research Officer & Dr. Sonja Großmann, Research Officer

International Networks, LMU Munich International Office

LMU Munich's International Networks team manages and develops the university's strategic partnerships and networks with leading universities and research institutions worldwide. These partnerships create opportunities for early-career researchers to build international networks, initiate joint projects, participate in academic exchanges and workshops, and access selected mobility and funding opportunities.

Drop by to discover how LMU's strategic partnerships can support your international research journey. We provide information on opportunities available through LMU's partnerships with leading universities and research institutions worldwide, including mobility and seed funding schemes, research stays, joint workshops and networking opportunities.

Doctoral researchers and postdocs can explore opportunities to connect with researchers at partner institutions, develop new international collaborations, strengthen existing research links, and access partnership-specific calls and activities. We can also help you identify which of LMU's strategic partnerships may be relevant to your research interests and point you towards the appropriate contacts and funding opportunities.

Our services are open to all LMU-affiliated researchers.

Meet me at the Opportunities Fair:

Dr. Anna Lohse, Head of International Networks LMU Munich

Max-Planck-Gesellschaft

Unit for International Relations

The Max Planck Society conducts basic research in the natural sciences, life sciences, and humanities. It was founded in 1948 as a successor organisation to the Kaiser Wilhelm Society and has 31 Nobel laureates in its ranks. With its 85 Max Planck Institutes and facilities, it is the international flagship for German science: in addition to four institutes outside of Germany, it operates another 20 Max Planck Centers with leading research institutions worldwide. The Max Planck Society is equally funded by federal and state governments.

The Max Planck Society employs approximately 26,700 people, more than 63 percent of whom work in research. The Max Planck Society includes in this figure its directors, research group leaders, research staff, postdocs, doctoral candidates, research and student assistants, research fellows, and visiting scholars. Among doctoral candidates with funding agreements, the proportion of international students was as high as 64.3 percent.

Our representatives from the Israel and Middle East department in the MPG-Unit of International Relations inform about opportunities for young researchers within this particular region. What options does the Max Planck Society offer to PostDocs and doctoral researchers? In particular, we want to inform about the prestigious and fairly new Max-Planck-Weizmann PostDoc Program as well as the Fellowship Program of the Minerva Stiftung, a subsidiary of the MPG.

The offers are open to international and German Postdocs and doctoral researchers.

[Max Planck-Weizmann Postdoctoral Programme](#) | [Minerva Fellowship](#) | [LinkedIn](#)

Meet us at the Opportunities Fair:

Dr. Lou Bohlen, Head of Israel and Middle East Unit and Head of Office Minerva Stiftung
Stefanie Gottschalk, Program Manager Joint MPG-WIS PostDoc Program and PR Minerva Stiftung

Research in Bavaria

Research in Bavaria is an initiative launched by Bavarian universities and the Bavarian State Ministry of Science and the Arts.

It targets young academics from all over the world, particularly graduates, PhD candidates and Postdocs. The idea is to spark their interest in academic and scientific opportunities in the region, connect them with their peers at Bavarian universities, and thereby promote international scientific exchange.

Research in Bavaria provides information on research activities, career paths, funding and support services, to help talented researchers discover the many opportunities offered by Bavaria's universities. Job offers are regularly posted on LinkedIn and Facebook.

Researchers at Bavarian universities are welcome to join our community. Help us showcase Bavaria as a welcoming, diverse and innovative region by serving as role models, presenting your work on our website and contributing to our blog and social media channels.

You can also publish job offers on our social media channels if you want to grow your international team.

The offers are open to researchers of all levels, disciplines and backgrounds are welcome to join our community.

Meet us at the Opportunities Fair:

Christine Söker, Policy Officer

Minh Anh Nguyen

Bayerische Forschungsallianz (BayFOR) GmbH

The Bavarian Research Alliance provides comprehensive advisory services on EU research and innovation funding and can help you put together your application and look for suitable project partners.

With the Bavarian initial funding programme BayIntAn, we can help you prepare your international project and set up scientific partnerships with international research institutions.

Our Scientific Coordination Offices focus on instigating collaborative research and innovation projects with stakeholders from Bavaria and Québec, Alberta, Israel, Africa. BayFOR is a partner institution in the Bavarian Research and Innovation Agency and is supported by the Bavarian State Ministry of Science and the Arts.

We provide advice regarding research and innovation funding – this includes helping you find the right funding programme for your project idea or supporting you with advice during the application procedure.

We specialise in EU funding (especially Horizon Europe), but also support applications to other funding programmes. We regularly offer workshops regarding funding opportunities, drafting applications or project management. Postdocs (or higher) can apply for our BayIntAn programme to initiate international scientific collaborations.

All researchers and further stakeholders in Bavaria can make use of our services; the Bavarian initial funding programme (BayIntAn) is open to researchers at Bavarian universities holding a doctoral degree (postdoctoral level or higher) – however doctoral candidates may be involved in the project.

Meet us at the Opportunities Fair:

Janina Schneider, Scientific Officer, Unit Health Research & Biotechnology

Dr. Evamaria Stütz, Scientific Officer, Unit Health Research & Biotechnology

BAYERISCH-FRANZÖSISCHES
HOCHSCHULZENTRUM
CENTRE DE COOPÉRATION
UNIVERSITAIRE FRANCO-BAVAROIS

BayFrance

Franco-Bavarian University Cooperation Center (BayFrance)

BayFrance (Franco-Bavarian University cooperation center) is the contact and the service center for the university and research cooperation between France and Bavaria.

Our mission:

- Giving advice to students, scientists and universities.
- Student Mobility grants and funding of small projects.
- Scientific Event Management.

The office with its binational team is located in the city center of Munich, hosted by the Technical University of Munich.

The center is financially supported by the Bavarian Ministry of State for Science and the Arts (StMWK); and the French Ministry of Europe and Foreign Affairs (MEAE).

Our offers include:

- Funding programs between Bavaria and France
- Giving advice to Post-docs and PhDs
- Co-Organising summer schools for young scientists
- Bavarian-French recruiting forum for young professionals

Our offers aim at senior researchers, young scientists as well as students in Bavaria and France.

Meet us at the Opportunities Fair:

Axel Honsdorf, Susanne Schwanbeck & Matthieu Rhode

Bayerisch-Tschechische
Hochschulagentur
Česko-bavorská
vysokoškolská agentura

Bavarian-Czech Academic Agency (BTHA)

Bavarian-Czech Academic Agency (Bayerisch-Tschechische Hochschulagentur, BTHA) acts as the central contact partner for all aspects of bilateral cooperation between Bavaria and Czechia in the field of higher education. The main task of the BTHA is to make a significant contribution to the development of a specialist first-class and sustainable academic network in research and teaching by networking, advising and funding the higher education institutions.

With a customized approach to funding not only academic exchange at all levels but also the initiation and implementation of research cooperation, the BTHA brings together the academic strengths of both countries.

BTHA funding encompasses grants for study abroad programmes, language courses, summer and winter schools in Bavaria and Czechia as well as mobility grants for internships, research travels and excursions. The financial support is complemented by various networking and consulting services for students, teachers, researchers as well as for the executives of the Bavarian and Czech universities and academic institutions.

Our offers aim at students, scholars and reseachers of Bavarian universities and universities of applied sciences.

Meet me at the Opportunities Fair:
Radka Bonacková, Executive director

Bavarian Academic Center for Central, Eastern and Southeastern Europe

The Bavarian Academic Center for Central, Eastern and Southeastern Europe (BAYHOST) is an institution of all Bavarian universities and promotes academic exchange and scientific cooperation between Bavaria and Central, Eastern, and Southeastern Europe. BAYHOST's funding includes grants for language courses, study abroad programs, and research stays in Bavaria or in Central, Eastern, and Southeastern Europe.

In addition, BAYHOST uses its extensive network to support Bavarian universities in their collaboration with academic institutions in partner countries and in establishing new partnerships. As part of the Taras Shevchenko Program, BAYHOST also runs a Coordination Office for Ukraine, which consolidates funding and support services for Ukrainian students and researchers and serves as a central point of contact for them.

We offer

- One-year scholarship program of the Free State of Bavaria for PhD studies at Bavarian universities for graduates from 10 countries in Central, Eastern and Southeastern Europe (either a full doctoral degree in Bavaria or a one-year research stay as part of doctoral studies in the home country)
- Mobility grants for early-career researchers for short-term research stays in Central, Eastern, and Southeastern Europe or in Bavaria (in cooperation with a Bavarian university)
- Funding and advice on grant programs offered by the Free State of Bavaria's partner countries for research stays in Central, Eastern and Southeastern Europe
- Language course grants in Central, Eastern, and Southeastern Europe as well as in Bavaria
- Networking events on various topics that are open to interested parties

Our programs are open to students, PhDs and postdocs at Bavarian universities who are interested in Central, Eastern, and Southeastern Europe - and vice versa.

Meet me at the Opportunities Fair:

Radka Bonackova, Executive Director

Katrin Döppe, BAYHOST scholarship coordinator

Bavarian-Indian Centre for Business and University Cooperation (BayIND)

Since 2008, the Bavarian-Indian Centre for Business and University Cooperation (BayIND) has been coordinating exchange and cooperation between Bavaria and India. Funded by the Free State of Bavaria, BayIND serves as a point of contact for students, higher education institutions and companies from its two locations in Hof and Bengaluru.

BayIND advises and supports Bavarian researchers (and students) both before and during their stay in India. As a point of contact, BayIND provides advice on funding opportunities, stays in India, cultural and practical matters, and the diverse opportunities offered by Indian higher education institutions.

Services are open to students and researchers from all Bavarian Universities.

Meet us at the Opportunities Fair:

Wiebke Dörfler, Managing Director

Olga Schloss, Manager University Relations

Bayerisches Hochschulzentrum für Lateinamerika (BAYLAT)

The Bavarian University Center for Latin America (BAYLAT) is a statewide service institution of the Bavarian State Ministry of Science and the Arts (StMWK). BAYLAT promotes networking between Bavarian and Latin American universities and research institutions. Its mission is to raise awareness of Bavaria as a hub for technology and innovation, as well as for science and higher education, in Latin America.

BAYLAT offers funding opportunities and support for researchers at Bavarian universities who are interested in developing academic and scientific collaborations between Bavaria and Latin America. Through LATinBAY, our network for Bavaria–Latin America cooperation, we connect researchers in Bavaria who collaborate with Latin American partners or conduct research related to Latin America. The network provides opportunities to identify potential research partners, exchange expertise and strengthen international academic collaborations.

Our services are open to all researches at all Bavarian Universities, no matter the discipline of the research.
